

# Agilent 33120A Function/Arbitrary Waveform Generator

Data Sheet

- Sine, triangle, square, ramp, noise and more
- 12-bit, 40MSa/s, 16,000-point deep arbitrary waveforms
- · Direct digital synthesis for excellent stability

### Uncompromising performance for standard waveforms

The Agilent Technologies 33120AFunction/Arbitrary Waveform Generator uses direct digital-synthesis techniques to create a stable, accurate output signal for clean, lowdistortion sine waves. It also gives you fast rise- and fall-time square wave, and linear ramp waveforms down to  $100 \mu$ Hz.

### **Custom waveform generation**

Use the 33120A to generate complex custom waveforms such as a heartbeat or the output of a mechanical transducer. With 12-bit resolution, and a sampling rate of 40 MSa/s, the 33120A gives you the flexibility to create any waveform you need. It also lets you store up to four 16,000-deep waveforms in nonvolatile memory.

### Easy-to-use functionality

Front-panel operation of the 33120A is straightforward and intuitive. You can access any of ten major functions with a single key press or two, then use a simple knob to adjust frequency, amplitude and offset. To save time, you can enter voltage values directly in Vp-p, Vrms or dBm. Internal AM, FM, FSK and burst modulation make it easy to modulate waveforms without the need for a separate modulation source. Linear and log sweeps are also built in, with sweep rates selectable from 1 ms to 500 s. GPIB and RS-232 interfaces are both standard, plus you get full programmability using SCPI commands.

### **Optional phase-lock capability**

The Option 001 phase lock/TCXO timebase gives you the ability to generate synchronized phase-offset signals. An external clock input/output lets you synchronize with up to three other 33120As or with an external 10-MHz clock.

Option 001 also gives you a TCXO timebase for increased frequency stability. With accuracy of 4 ppm/yr, the TCXO timebase make a 33120A ideal for frequency calibrations and other demanding applications.

With Option 001, new commands let you perform phase changes on the fly, via the front panel or from a computer, allowing precise phase calibration and adjustment.

### Link the Agilent 33120A to your PC

The included Agilent IntuiLink software allows you to easily create, edit, and download complex waveforms using the IntuiLink Arbitrary Waveform Editor. Or you can capture a waveform using IntuiLink Oscilloscope or DMM and send it to the 33120A for output. For programmers, ActiveX components can be used to control the instrument using SCPI commands. IntuiLink provides the tools to easily create, download, and manage waveforms for your 33120A. To find out more about IntuiLink, visit **www.agilent.com/find/intuilink**.

The 33120A can also be used in conjunction with the 34811A BenchLink Arb software. This Windows®-based program lets you create and edit waveforms on your PC and download them to the 33120A.

### Waveforms

Ordering Information Agilent 33120A Function/Arb Generator Opt. 001 Phase Lock/TCXO Timebase Option

#### **Ordering Information**

33120A Function/Arbitrary Waveform Generator

#### Accessories included

Operating manual, service manual, quick reference guide, IntuiLink connectivity software, test data, and power cord

#### **Options**

Opt. 001 Phase lock/TCX0 timebase Opt. 106 BenchLink Arb software (34811A) Opt. 1CM Rack Mount Kit (34190A)\* Opt. 910 Extra manual set

#### Manual language options (please specify one)

ABA US English ABD German ABE Spanish ABF French ABJ Japanese ABZ Italian ABO Taiwan Chinese AB1 Korean

#### Accessories

Agilent 34161A Accessory pouch Agilent 34811A BenchLink Arb software

\*For racking two side-by-side, order both items below Lock-link Kit (P/N 5061-9694) Flange Kit (P/N 5063-9212)

## Agilent Technologies' Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

### Our Promise

Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

#### Your Advantage

Your Advantage means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional engineering services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.
