

DPO4 Series Modules

Application Modules

Module	Description
DPO4AUDIO	Audio Serial Triggering and Analysis Module. Enables triggering on packet level information on I ² S, LJ, RJ, and TDM audio buses as well as analytical tools such as digital views of the signal, bus views, packet decoding, search tools, and packet decode tables with time stamp information.
DPO4AUTO	Automotive Serial Triggering and Analysis Module. Enables triggering on packet level information on CAN and LIN buses as well as analytical tools such as digital views of the signal, bus views, packet decoding, search tools, and packet decode tables with time stamp information.
DPO4AUTOMAX	Extended Automotive Serial Triggering and Analysis Module. Enables triggering on packet level information on CAN, LIN, and FlexRay buses as well as analytical tools such as digital views of the signal, bus views, packet decoding, search tools, packet decode tables with time stamp information, and eye-diagram analysis software.
DPO4COMP	Computer Serial Triggering and Analysis Module. Enables triggering on packet level information on RS-232/422/485/UART buses as well as analytical tools such as digital views of the signal, bus views, packet decoding, search tools, and packet decode tables with time stamp information.
DPO4EMBD	Embedded Serial Triggering and Analysis Module. Enables triggering on packet level information on I ² C and SPI buses as well as analytical tools such as digital views of the signal, bus views, packet decoding, search tools, and packet decode tables with time stamp information.
DPO4PWR	Power Analysis Application Module. Enables quick and accurate analysis of power quality, switching loss, harmonics, safe operating area (SOA), modulation, ripple, and slew rate (dI/dt, dV/dt).
DPO4VID	HDTV and Custom (nonstandard) Video Triggering Module.
