

Sorensen XFR Series

2.8 kW

DC Power Supply with Zero Voltage "Soft Switching"

7.5–600 V

- Analog programming
- Zero voltage "soft switching"
- Constant voltage or constant current operation with automatic crossover and mode indication
- Standby/Remote/Local modes
- Front panel button preview of voltage, current, OVP
- Remote sense, 5 V line loss compensation
- LabVIEW® and LabWindows® drivers

4–300 A

ETHERNET ↔ GPIB ↔ RS232

The Sorensen XFR Series provides 2.8 kilowatts of power for research, product development, and production test applications such as magnet control, ATE, process control, electroplating and burn-in. The XFR Series is ideal for applications where high power and a wide adjustment of output voltage or current is required.

The XFR Series features zero voltage "soft switching" which virtually eliminates switching transients, resulting in lower noise performance that is closer to linear levels. Soft switching also increases efficiency, decreases heat generation, and reduces stress on the switching transistors – resulting in higher reliability.

The XFR Series is designed for excellent thermal management so each unit can be conveniently stacked in rack mounts without leaving ventilation space between each unit.

XFR Series : Product Specifications

| Common | |
|---|---|
| Switching Frequency | XFR 2.8 kW: Nominal 31 kHz (62 kHz output ripple) 60 V to 600 V models: nominal 62.5 kHz (125 kHz output ripple). |
| Time Delay | 7 sec maximum from power on until output stable |
| Voltage Mode Transient Response Time | < 3 ms for output voltage to recover within 0.5% of its rated voltage after a step change in load current of up to 10% to 90% of rated output |
| Maximum Voltage Differential | ±600 Vdc from output to safety ground |
| Remote Start/Stop and Interlock | 2.5-15 V signal or TTL-compatible input, selectable logic |
| Remote Analog Programming | Voltage and current programming inputs (source must be isolated): 0-5 k, 0-10 k resistances; 0-5 V, 0-10 V (default) voltage sources |
| Remote Analog Monitoring | Voltage and current monitor outputs 0-5 V, 0-10 V (default) ranges for 0-100% of output |
| Remote Programming & Monitoring Accuracy | 1% zero to full scale output for the default range |
| Maximum Remote Sense Line Drop Compensation | 5 V / line (Line drop is subtracted from total voltage available at supply output.) |
| Front Panel Voltage and Current Control | 10-turn voltage and current potentiometers |
| Front Panel Voltage Control Resolution | 0.02% of maximum voltage |
| Main Output Connector | XFR 2.8 kW: 7.5 - 100 V models: nickel-plated copper bus bars with bus bar cover and strain relief; 150V to 600 V models: 4-terminal, wire clamp connector with cover and strain relief |
| Approvals | NRTL approved and CE-marked to UL Std. No. 61010-1, CAN/CSA-C22.2 No. 61010-1-04, EN 610101-1 (Equipment Class I, Pollution Degree 2, Installation Category II) Meets USA EMC standard: FCC, part 15B, Class A; Meets Canadian EMC standard: ICES-001, Class A. |

| Input | |
|----------------------|---|
| Input Voltage Ranges | XFR 2.8 kW: 190-264 Vac, 1 ϕ (24.3 A @ 208 Vac; 20.5 A @ 230 Vac typical), 47-63 Hz; Option: M2 3 ϕ 208 Vac input |
| AC Input Connector | Type 3-terminal, 34 A, 250 V, wire clamp connector with strain relief cover |

| Protection Features | |
|-----------------------------|--|
| Over-voltage protection | |
| Over-temperature protection | |

| Environmental | |
|---------------------------|------------------------------|
| Operating Temperature | XFR 2.8 kW: 0 to 50°C |
| Storage Temperature | -20°C to 70°C |
| Humidity (Non-condensing) | Up to 90% RH, non-condensing |

| Physical | |
|------------|--|
| | XFR 2.8 kW |
| Dimensions | Width: 19" (429.4 mm) Height: 3.5" (88.9 mm) Depth: 21" (533.5 mm) |
| Weight | 33 lb (15 kg) |

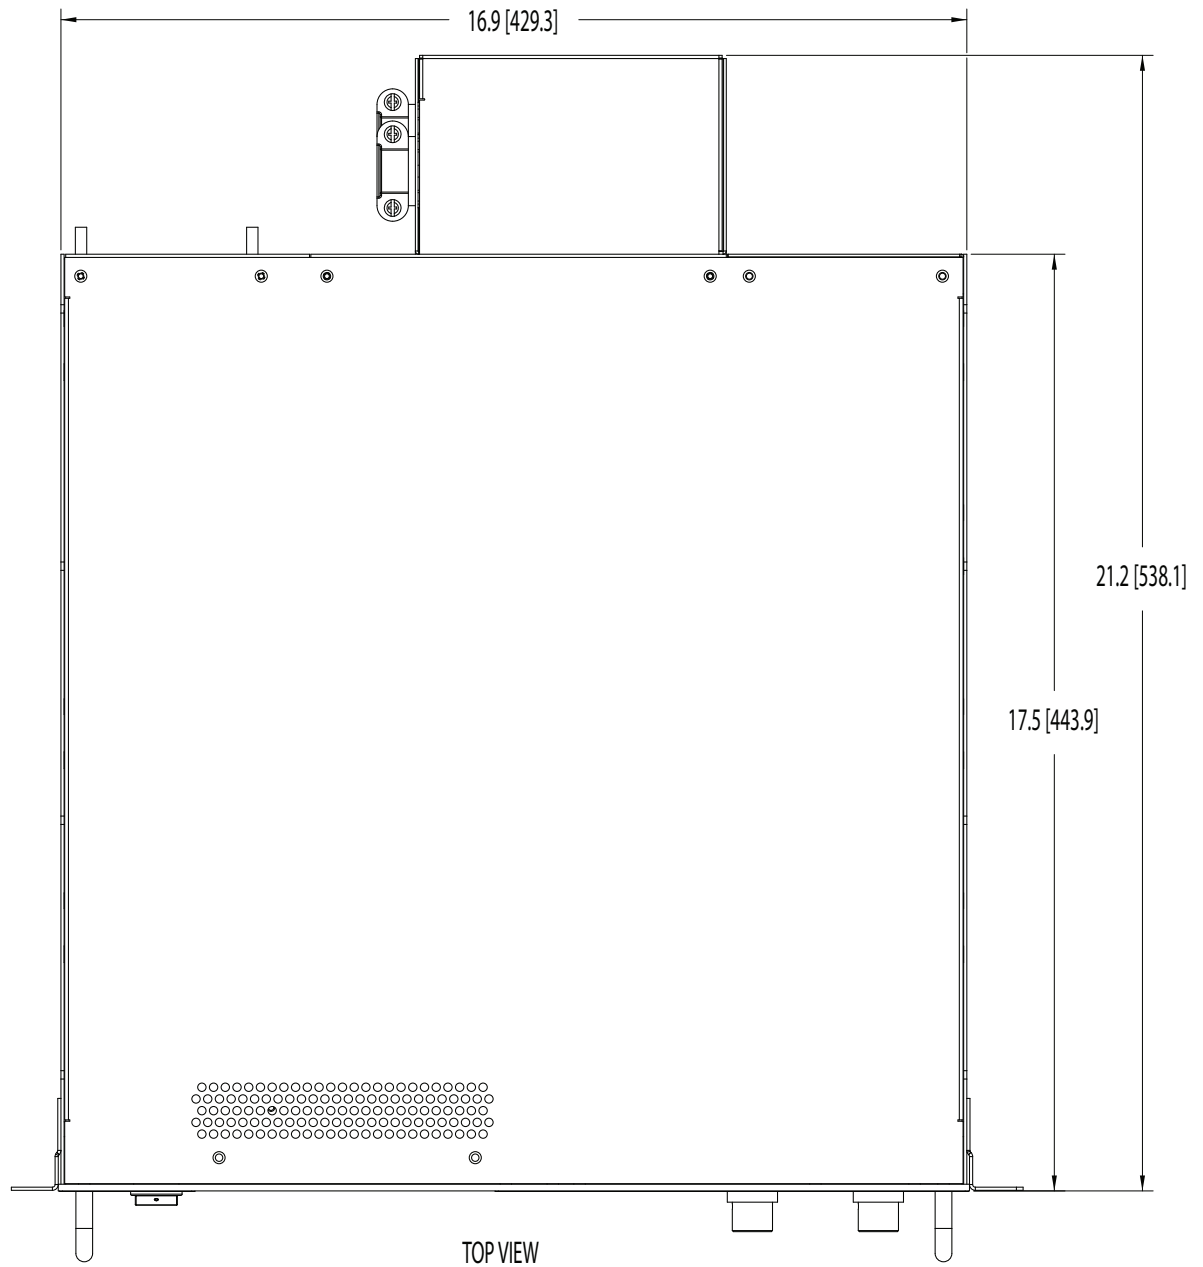

| Model | Output Voltage | Output Current | Output Power | Line Regulation ² | |

XFR Series : Diagram

Model Number Description

XFR 2.8 Options and Accessories

| | |
|------------|---|
| MGA / MGB* | GPIB / IEEE 488.1 |
| MGP | Multi-channel GPIB / IEEE 488.2 |
| MCA | CANbus interface for hardware linking multiple units (used with GPIB-M) |
| MRA / MRB* | RS-232 interface |
| MIA | ISOL interface card provides isolated analog control and readback |
| M2 | 3-phase 208 Vac input |

Specifications subject to change without notice.

1. Specifications indicate typical performance at 25°C ±5°C, nominal line input of 208 Vac.
2. For input voltage variation over the AC input voltage range, with constant rated load.
3. For 0-100% load variation, with constant nominal line voltage.
4. Maximum drift over 8 hours with constant line, load and temperature, after 30 minute warm-up.
5. Change in output per °C change in ambient temperature, with constant line and load.
6. Measured with stepped 0-10 V analog programming source and a resistive load.
7. Typical efficiency at nominal input voltage and rated output power.
8. Apply accuracy specifications according to the following voltage program accuracy example:
Set a model 20-130 power supply to 10 V. The expected result will be within the range of 10 V ± 75 mV ± 0.12% of the set voltage of 10 V.

* MGB/MRB 600V output only. MGA/MRA for output less than 600V GB 600V output only. MGA for output less than 600V
